<div class="about-text">

<p>

I'm a third-year Information Technology student at Manipal Institute of Technology, building a strong foundation across the full stack — from system architecture and REST APIs to responsive frontends and mobile apps.

</p>

<p>

I enjoy working on problems that require both precision and creativity: designing a secure encryption pipeline, structuring a clean database schema, or making a UI that feels natural to use. I'm equally comfortable diving deep into backend logic or polishing front-end details.

</p>

<p>

Outside coursework I'm an active Managing Committee Member of the IEEE Student Branch

at MIT Manipal — I led the "Retro Web Reboot" event for 100+ participants and contribute to technical workshops and competitions each semester.

</p>
